Title: Civil Draftsperson

Have you always wanted to work for a company who is a highly recognized Brand in their Industry? Do you want to continue to build your career with a company that offers continuous growth and autonomy? Do you pride yourself on your attention to detail and drive to progress in your career? If this describes you our Client wants to meet you and has a Civil Drafting Position waiting for you in their Regina office. Our Client offers a dynamic and innovative work atmosphere with opportunity to work with some of the most talented Senior Civil Engineering and Drafting staff. They are looking for candidates who want to grow and develop their career with them and strive to ensure their employees have an opportunity to excel and succeed in their career objectives.

This is an opportunity for a team player, take hold, hit the ground running type of individual to join a dynamic company and team as an integral part of their drafting department. The successful individual will have a minimum 5 years working as a Civil Drafter combined with in the field experience; a Civil Engineering degree would be considered an asset. You will have had continuous progression in your career with the aspirations to lead a team of Civil Drafters. Our client is looking for a very professional, personable, motivated, detail oriented team player to be an integral part of ensuring their continued success.

As Civil Drafter you are responsible for:

- Produce drawings using computer-assisted drafting systems (CAD & CIVIL) or drafting machines, or by hand using compasses, dividers, protractors, triangles and other drafting devices.
- Draw maps, diagrams, and profiles, using cross-sections and surveys, to represent elevations, topographical contours, subsurface formations and structures.
- Draft plans and detailed drawings for structures, installations, and construction projects such as highways, sewage disposal systems, transit, roads and dikes, working from sketches or notes.
- Determine the order of work and method of presentation, such as orthographic or isometric drawing.
- Finish and duplicate drawings and documentation packages, according to required mediums and specifications for reproduction using blueprinting, photography, or other duplicating methods.
- Review rough sketches, drawings, specifications, and other engineering data received from civil engineers to ensure that they conform to design concepts.
- Calculate excavation tonnage and prepare graphs and fill-hauling diagrams for use in earth-moving operations.
- Supervise and train other technologists, technicians and drafters.
- Correlate, interpret, and modify data obtained from topographical surveys, well logs, and geophysical prospecting reports.
- Determine quality, cost, strength and quantity of required materials, and enter figures on materials lists.

Skills, Knowledge & Abilities:

- Knowledge of design techniques, tools, and principles involved in production of precision technical plans, blueprints, drawings, and models
- Knowledge of arithmetic, algebra, geometry, calculus, statistics, and their applications
- Knowledge of the structure and content of the English language including the meaning and spelling of words, rules of composition, and grammar
- Knowledge of the practical application of engineering science and technology. This includes applying principles, techniques, procedures, and equipment to the design and production of various goods and services

- Knowledge of materials, methods, and the tools involved in the construction or repair of houses, buildings, or other structures such as highways and roads
- Knowledge of circuit boards, processors, chips, electronic equipment, and computer hardware and software, including applications and programming
- Knowledge of principles and methods for describing the features of land, sea, and air masses, including their physical characteristics, locations, interrelationships, and distribution of plant, animal, and human life
- The ability to read and understand information and ideas presented in writing
- The ability to see details at close range (within a few feet of the observer).
- The ability to communicate information and ideas in writing so others will understand
- The ability to listen to and understand information and ideas presented through spoken words and sentences
- The ability to communicate information and ideas in speaking so others will understand
- The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations)
- The ability to choose the right mathematical methods or formulas to solve a problem
- The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem
- The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged
- The ability to concentrate on a task over a period of time without being distracted

We thank all applicants in advance however only those qualified will be contacted all other resumes will be kept on file for future consideration. Those individuals without working papers or visa and unable to work in Canada will not be considered and need not apply.
